

PROJECT BRIEF

1. Project Title

From the Hills: Leveraging Traveler Insights to Enhance Eco-Tourism Homestay Experiences

2. Business Problem

Eco-tourism homestays receive a large amount of guest feedback through reviews and ratings, but most of this information remains scattered and underutilized. As a result, owners often rely on assumptions rather than evidence while making decisions about guest experience and service improvements. This project aims to analyze hospitality review data to identify the factors that most influence guest satisfaction and generate insights that can be applied to eco-tourism homestays and small hospitality businesses.

2. Target Audience

Homestay owners, eco-tourism operators, hospitality entrepreneurs, and business managers looking to improve guest experience and customer satisfaction.

3. Dataset(s) Identified

Dataset Name: Hotel Reviews Dataset

Source: Kaggle

Rows: ~7,001

Key Columns:

- Name (Hotel Name)
- Area
- Review_Date
- Rating_Attribute
- Rating (Out of 10)
- Review_Text
- Index

4. Key Business Questions

1. What factors are most commonly associated with positive and negative guest experiences?
2. Which themes appear most frequently in customer reviews and how do they influence ratings?

3. What actionable improvements can hospitality businesses implement to increase guest satisfaction and retention?

5. Proposed Tool Stack

- Python (Pandas)
- Google Colab
- Matplotlib
- Looker Studio / Tableau Public
- ChatGPT / Gemini

6. Expected Capstone Output

The final project will provide a data-driven analysis of traveler feedback and identify key drivers of guest satisfaction. Based on the findings, practical recommendations will be proposed that can help eco-tourism homestays improve guest experience, strengthen customer loyalty, and make better business decisions.
